Total prevalence (Red & Blue)	18.9*	5.1
% of Blue	12.8	4.2
% of Red	6.1	0.8

\* This figure is **not** the national prevalence. It is the total prevalence in schools who submitted retest data. It could be argued that schools with very low prevalence would not need to submit retest data anyway - it is more likely that schools with high prevalence will submit retest data.
